VIKRAM JHA

Full Stack Web Developer (MERN)

PROFILE

Enthusiastic and detail-oriented MERN Stack Developer with a strong foundation in building dynamic and responsive web applications using MongoDB, Express.js, React.js, and Node.js. Skilled in developing full-stack applications, RESTful APIs, and modern UI/UX designs. Passionate about clean code, learning new technologies, and solving real-world problems through efficient solutions. Eager to contribute to a collaborative and fast-paced development team.

HOBBIES

- Creating frontend Single Page Applications (SPAs) using React.js

EDUCATION

Delhi University – (CBCS) B.COM (PROG.)
Delhi, India
August 2020-May 2023

Jain University – MCA(Master of Computer Application)
Bengaluru, India
January 2024-January2026

PROJECTS

React.js Frontend Projects (10+ Apps)
Developed 10+ single-page applications (SPAs) using React.js, demonstrating practical understanding of JSX, state management, React Router, and functional components.

To-Do List App using MERN (Personal Project)
- Built a simple yet functional To-Do List application using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implemented features such as task creation, updating, deletion, and completion toggling.
- Designed a responsive UI with React.js and styled it using basic CSS or a framework like Bootstrap.
- Focused on clean code, component-based architecture, and modular backend routes.

SKILLS

Frontend: HTML, CSS, JavaScript, React.js, Bootstrap
Backend: Node.js, Express.js
Databases: MongoDB
